

DIBUJOS TÉCNICOS DEL SISTEMA ZOOM - Industrias mineras

El objetivo principal de estos dibujos completos del sistema es proporcionar al cliente una representación de todo el sistema de monitoreo ZOOM. Todo comienza con la instalación de los sensores, seguido del cableado para finalmente llegar al gabinete de instrumentación y la conexión al servidor ZOOM. También incluye todas las interacciones con los sistemas de control del cliente (SCADA, PLC, red corporativa, etc...). También es una referencia que se utiliza para guiar a todas las partes involucradas durante la instalación, tanto para la planificación y ejecución de obras. Cuando se considere que la instalación está completa, los dibujos completos del sistema se convertirán en la referencia a largo plazo para recordar cómo se instala el sistema de monitoreo ZOOM.

CARACTERÍSTICAS PRINCIPALES DE LOS DIBUJOS

- El contenido de los dibujos está agrupado por especialidades para dividir fácilmente el trabajo
- Se proporciona una primera versión en las primeras etapas de la instalación con fines de planificación
- Se ofrecen actualizaciones de planos durante las distintas etapas de instalación y puesta en servicio
- Se proporcionará una versión final al finalizar la instalación y la puesta en servicio

Secciones de dibujos y contenido detallado.

Sección	Descripción
A. Diagramas de alto nivel y detalles de red.	Incluye la disposición general, incluida la descripción general del sistema, el diagrama de flujo del sistema, el diagrama de bloques y, finalmente, el diseño de la red.
B. Ubicaciones de cadenas de medición y detalles de instalación	Incluye detalles de instalación para cada sensor, incluida la vista general del molino con ubicación del sensor, detalles de instalación y vista aproximada del sensor.
C. Mecánico	Incluye los detalles de instalación de cada componente mecánico, es decir dimensiones, holgura, anclaje del gabinete y montaje de todo tipo de cajas de conexiones.
D. Cableado	Incluye el cableado detallado para la conexión de todas las cadenas de medición, desde cada sensor hasta la conexión dentro del gabinete de instrumentación.
E. Componentes internos y cableado del gabinete de monitoreo ZOOM	Incluye los diseños de equipos y también se incluyen descripciones generales de cada ZPU-5000. También incluye el esquema eléctrico detallado del armario.
F. Caja de conexiones (WME) componentes internos y cableado	Incluye el detalle de gabinetes y cajas, mostrando la ubicación de cada acondicionador de señal y la asignación de los bloques de terminales.

THE UNTHREADED HOLE POSITION IS ONLY INDICATIVE AND SHOULD BE CONFIRMED ACCORDING TO OBSTACLES THAT CAN BE FOUND INSIDE AND LIMITING THE PASSAGE OF CABLES.

THE BOX ARRANGEMENTS ARE ONLY INDICATIVE. THEIR POSITIONS CAN BE ADJUSTED.

DO NOT DRILL HOLES TO PASS CABLES THROUGH THE BACK OF THE WME E1 & E4. THIS WILL PUSH HOT AIR FROM THE MILL IN THE WME. PASS THE CABLES THROUGH THE TOP/BOTTOM OR THROUGH THE SIDES OF THE WME

THE PASSTHROUGH BOX E1A & E4A ARE INSTALLED UNDERNEATH THEIR RESPECTIVE WME (E1 & E4)

THE WME E1 & E4 MUST BE ACCESSIBLE FROM THE PERMANENT SCAFFOLDS OF THE MILL. THE BOTTOM OF THE WME MUST BE 100 CM +/- 50 CM FROM THE PERMANENT SCAFFOLDS.

MAKE SURE THAT YOU HAVE THE NECESSARY CLEARANCE TO OPEN THE DOOR OF EACH BOX. SEE SHEET C6 FOR DETAILS
